## Messaging

Not added a fancy contact form yet, also not sure if I ever will, I don't think you actually need it to get in touch with me :)

**Email:** [dominik@wombacher.cc](mailto:dominik@wombacher.cc)  
**XMPP:** [wombelix@jabber.de](xmpp:wombelix@jabber.de)

## Public Keys

### OpenPGP

Please do me a favor and don't upload the key to any Keyserver, the whole System seem just to be broken, so I think the best way is to share keys via download from the personal website or attached to an E-Mail.

### SSH

You might think it's odd that I publish my SSH Key? Actually, just using it already [expose the ssh public key](#). (Archive: [\[1\]](#), [\[2\]](#))

But it's not really a big thing, also this way you can at least verify that's indeed my SSH Key, in case you going to add them somewhere to grant me access ;)
