Status: published

As mentioned in my [last Fedora / EPEL packaging post](#), updates for [aws-c-io](#) and [aws-c-http](#) are coming. They now arrived in `Rawhide` and all Stable Fedora branches as well as EPEL8 and EPEL9.

Since today, the new package [aws-c-s3](#) is available in Fedora and EPEL too.

I plan to package [aws-c-iot](#), [aws-crt-ffi](#) and [aws-lc](#) for Fedora and EPEL in the next couple of months.

In addition, I will build all current EPEL9 packages I maintain soon for EPEL10 as well, stay tuned.
