

Public Money, Public Code - Couldn't agree more!

Date: 2021-06-21
modified: 2021-06-21
Author: Dominik Wombacher

Couldn't agree more, Code as part of developments for the public sector should be Open Source.
That way so much would be possible like tax savings, better collaboration and encourage innovation.

Quote from <https://publiccode.eu/>:

```
> Why is software created using taxpayer's money not released as Free Software?  
> Code paid by the people should be available to the people!
```
