September was somehow my *SUSE Learning month*, first I [Updated my SCA and SCE to SLE 15](#), followed by earning [SCA SLE HA 12 & 15](#) and today I also became a **SCA+ in SLES for SAP Applications 12!**

I very proud about that huge learning progress and the successful certifications in September, they helped me to brush up some knowledge and prepare for my new gig in October.

Summary: "SCA+ in SLES for SAP Applications 12" is for administrators who are managing SLES instances as the platform for SAP deployments. With a focus on specific functionality provided by SLES for SAP including SLES High Availability as well as components specific to SAP NetWeaver and SAP HANA based deployments and security of SLES systems.
