**tags:** SUSE, Certification, SUSE Manager, Deployment, Specialist, Exam  
**description:** SCDS in SUSE Manager 4 Exam passed  
**category:** Certification  
**slug:** suse-certified-deployment-specialist-in-suse-manager-4  
**Author:** Dominik Wombacher  
**lang:** en  
**transid:** suse-certified-deployment-specialist-in-suse-manager-4  
**Status:** published

By passing the Exam and getting recognized as **SCDS in SUSE Manager 4** today, my SUSE Training & Certification Month comes to an end. I didn't planned to take this one in September but I had such a good run and couldn't resist.

**Summary:** Knowledge of the various architectural components of a SUSE Manager, installation and post-installation configuration process for SUSE Manager Servers and SUSE Manager Proxy Servers, a detailed understanding of the various methods that can be used to on-board target servers as managed Salt Minions and an understanding of how to provide a well-managed and controlled approach to system patching and system updating.
