**Status:** published

Since [July](#) the SUSECON 23 session recordings were available on-demand but required a registration. They now became public available on [YouTube](#)!

I talked about [Rancher integration with AWS services, possibilities, challenges and outlook \(PROD 1178\)](#) and [SUSE ALP prototype on AWS, Experimental, but fun \(TUT 1179\)](#).

The sessions from my peers at AWS I want to highlight are [SUSE Maintenance Operations on AWS Demystified \(TUT 1137\)](#) and [How SUSE and AWS partner to drive customer success \(TBO 1042\)](#).

I'm looking forward to next years SUSECON and hope I have the opportunity to speak again about SUSE on AWS.
